

INTRODUCTION

Neuro-Linguistic Programming™ (NLP™) is defined as the study of the structure of subjective experience and what can be calculated from that and is predicated upon the belief that all behaviour has structure.

Neuro-Linguistic Programming™ was specifically created in order to allow us to do magic by creating new ways of understanding how verbal and non-verbal communication affect the human brain. As such it presents us all with the opportunity to not only communicate better with others, but also learn how to gain more control over what we considered to be automatic functions of our own neurology. (<http://www.neurolinguisticprogramming.com>)

BENEFITS

NLP is valuable in business, consulting, therapy, management, health professions, sports, parenting, creative pursuits, education, training and development, sales, negotiation and even writing.

NLP, explores how we think and feel, and examines the "inner" language we use to represent our experiences. It also studies what we know about human interaction and human achievement, and uses that knowledge to "model" excellence in every walk of life. The theories and techniques of NLP will help you to discover what makes some people excel in their lives, and gives you the practical tools to do the same.

NLP Practitioner

Certification provides the key to keep sales persons in a motivated state to increase sales volume. Make engineers have more flexibility to explore options outside their comfort zone. Teachers to be more effective in delivering knowledge by understanding their students better.
